

Cycle Shelters Price List

The need for a cycle shelter is obvious. But do you have to have modernistic steel and glass, or would your establishment be enhanced by an attractive, sturdy, more rustic-looking construction?

The Timberline Cycle Shelter is exactly that. Built to a very high standard from substantial timber, fully pressure treated, and with a double skinned, attractively designed roof, the cycles are held upright in the stainless steel racking system, featured on the photographs.

Attractive, substantial, practical and excellent value.

	SP ex VAT	SP inc VAT
Cycle Shelter (includes racks)	£3245	£3813
